

# Anticipation Hub

Earth Observation Working Group:

Humanitarian Sector Assessment  
(WP1)

12th July 2021

Eric Anderson (NASA), Markus Enenkel (WB), Jennifer Paris (NASA), John Bevington (JBA Consulting), Rogério Bonifacio (WFP), Jothinganesh Sundaram (WFP), Karen Dall (GRC)

# Anticipation Hub

How it started  
with WP1...

- Run in parallel to WP2
- Identification of hazard **type needs and lead time needs**
- Connect with members of the humanitarian community to obtain relevant information regarding the **use of EO in anticipatory action** and identify what has or has not worked in previous settings
- Identification of **what EO data** was used
- What **role did the data** play in terms of developing the EAP?
- Identification of approaches to **vulnerability and exposure** for determining “impact” (what aren’t we thinking about when we look at V&E (proxies for SE data - thatched roof versus metal roofs, etc. - livelihoods and natural resource dependencies)

**Anticipation**

**Hub**

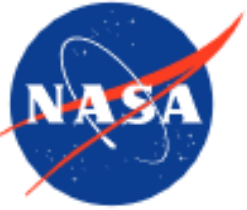

## Goals of WP1

- Documentation of **success stories**: Where has EO been used meaningfully in Anticipatory Action projects?  
→ *What has been done?*
- Identification and documentation of **bottlenecks and potential solutions**: Where are bottlenecks in the use, access and application of EO data and/or EO-derived information?  
→ *What could be done?*

**How it is  
going!**

# Timeline & Outputs

World Food Programme

*23rd July*

Clustering of hazards  
Structure for the first  
discussion paper  
Input from WFP

*Potential outputs:*

Blog post  
Case study  
Session at GDP/other  
conferences  
...

*9th July*

Discussion of  
bottlenecks/barriers and  
gaps/opportunities  
based on EAPs

*bi-weekly meetings until end of August*

**Get in touch!**
