

## *“Aid and Faith Eucerus”* NGO representative

During displacement, women and girls have experience insecurity in temporary shelters, due to the lack of required provisions to ensure their safety and security; lack of separated latrines/toilet and shower places and lack of lightening were also another serious concern. Health and reproductive services were not available impacting on safe delivery, maternal and childcare. You have experienced this yourself, after being displaced following the killing of your husband by the EFF.

You want to stress the specific needs of women and girls and make sure that adequate preventive measure is taken to ensure protection and access to services for women and girls and other groups with specific needs (e.g., separations of wash services in the temporary camps, reproductive and GBV services integrated in health emergency assistance, safe spaces for children in the camps).

Through your NGO you and want to offer more micro-finance opportunities to women-headed households so they can get back on their feet. You don't mind if they go back to their communities or decide to move to Momoal or surrounding areas; you understand that when people are given resources, they do with them what is most appropriate for their unique circumstance.

So far you have helped 644 families. Your standards support is \$500, offered in 5 monthly instalments of \$100.
